Birdville Autotech Program

Welcome to the BISD Autotech Program. We are excited to start another new year. This letter is to inform you what to expect this year. This program is divided into 3 classes. We like to welcome the new students from Keller ISD. We will do our best to make this class more than what you expected. The fee for this class is \$50 a year that covers your Skills Dues, Tee Shirt, 1st pair of Safety Glasses. Due date is September 16 2011.

What to expect from this class: This class is structured for students who are interested in a career in the transportation industry. We mainly focus on the automotive side of the field but we do our best to let students explore other areas when possible. We also place students in job related fields in the Auto 2 program if possible. Auto 1 program is mainly classroom taught with hands on training. As you progress in the program, more and more time is spent in the shop. Auto 2 is mainly shop time with classroom support.

As with any class we have a structure to follow. As you know the shop is the domain of the instructors that operate it. The rules and regulation are for the safety of all individuals that occupy the shop. It also is for the operation of the shop.

What we expect from our students is safety, responsibility, and effort. Safety is always first. Safety glasses are to be worn in the shop at all times. No work can be done in the shop without safety glasses. Students who do not have their safety glasses may perform other task such as cleaning the shop, or book work to avoid failing for the day. This rule will also apply when students are wearing attire that may be dangerous in the shop environment.

Most academic assignments are online. If you go to the website on the bottom of this page and select 'online classroom' on the left hand side, you can enter our online classroom that houses most of our lessons and assignments.

We all hope this will be a great year and we have many exciting things going on this year. For more information you can contact us
